Mehmet Derya Hazar

Full-Stack Developer

m.derya.hazar@gmail.com · +90 554 351 4916 · LinkedIn · GitHub · GitHub (Work) · Portfolio

SUMMARY

Full-Stack Developer building REST APIs, Next.js dashboards, and PostgreSQL data layers with Prisma, plus third-party integrations across HubSpot, AWeber, and n8n. Currently shipping AI-powered web applications at Undetectable AI / TruthScan, following a transition into software development from linguistics and data-quality control.

EXPERIENCE

Undetectable AI / TruthScan December 2025 – Present

Full-Stack Developer

- Build and maintain Python and FastAPI backend services for AI-detection wrappers and database connections, exposing REST API endpoints consumed by a Next.js front end.
- Develop dashboard features with Next.js, React, and TypeScript, building responsive UI components and improving front-end performance.
- Design and manage PostgreSQL data with Supabase and Prisma ORM, including schema design and database migrations.
- Built integrations with three external systems (HubSpot CRM, AWeber, and n8n), plus AI-powered automation workflows, partnering with the sales team to streamline lead and customer-data flow.

Violida Tech Solutions January 2025 – November 2025

Full-Stack Developer

- Built a beauty-artist mobile app for 2 platforms (iOS and Android) with React Native, delivering responsive UI components and optimizing front-end performance.
- Designed relational PostgreSQL schemas and containerized services with Docker for repeatable deployment.

JoVE February 2024 – December 2024

Quality Controller

- Performed linguistic quality control on machine-translated content at 98% accuracy, and built 2 automation tools that improved subtitle-processing efficiency by 40%.

Veeva Systems 2021 – 2024

Quality Controller

- Organized and verified data using SQL, achieving a 99% data-accuracy rate and improving query and retrieval performance through structured tagging.

LANGUAGES & TECHNOLOGIES

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React, Next.js (App Router), React Native, Redux, Tailwind CSS, Vue.js, jQuery

Backend & Data: Node.js, FastAPI, REST API design, Spring Boot, PostgreSQL, Supabase, Prisma, MySQL, JWT

Integrations & DevOps: HubSpot CRM, AWeber, n8n, Docker, Git, CI/CD, AWS, Azure, Firebase, Postman, Swagger

PROJECTS

E-Commerce Platform | *React, Tailwind CSS* GitHub

- Built a full-featured e-commerce web app and contributed feature updates, component builds, and testing for new customer-facing pages.

Pizza Order App | *JavaScript* GitHub

- Built an ordering interface with integrated order management for users to place, view, and track orders.

Personal Portfolio | *React, Tailwind CSS* GitHub · Live

- Designed and built a portfolio site with dark mode and 2 language options through i18n localization.

EDUCATION

Workintech, Full Stack Development Program 2024 – 2025

Middle East Technical University, B.A. in Philosophy 2016 – 2020

CERTIFICATIONS

Insider Developer Bootcamp, Insider (2025) · Full Stack Development, Workintech (2025) · Frontend Development, Workintech (2024) · CS50P: Introduction to Programming with Python, Harvard University (2023)
